The screenshot shows the DynamicHealth website interface. At the top, there's a navigation bar with categories like Diseases & Conditions, Signs & Symptoms, Tests & Labs, Care Interventions, Skills, Drug Guide, and Patient Handouts. A search bar on the right contains the word 'asthma'. Below the navigation bar, the main content area is titled 'SHOWING: asthma'. On the left, there's a 'Filter Results' section with checkboxes for Content Type (Care Interventions, Diseases & Conditions, Signs & Symptoms, Skills, Tests & Labs) and Patient Population (Adult, Pediatric). The main content area displays a list of results, including 'Educating About Asthma in Pediatric Patients', 'Providing Care for Adults with an Asthma Exacerbation', 'Asthma Interventions, Child', 'Asthma Interventions, Adolescent', 'Asthma, Maternal (Risk to Children)', and 'Asthma Interventions, Adult'. On the right, there's a sidebar with 'Images' and 'Videos' sections. The 'Images' section shows a diagram titled 'Asthma Contributing Factors' with a list of factors: 1. Not inhaled, 2. Airway irritants, 3. Spontaneous stress, 4. Food allergy, 5. Cleaning, 6. Cold and flu, 7. Aspiration, 8. Tobacco smoke, 9. Asthma exacerbation, 10. Respiratory tract infection. The 'Videos' section shows a video thumbnail titled 'Asthma Management in Adults'.

The screenshot shows the 'Asthma, Adolescent' page on the DynamicHealth website. The page has a navigation bar with categories like Diseases & Conditions, Signs & Symptoms, Tests & Labs, Care Interventions, Skills, Drug Guide, and Patient Handouts. A search bar on the right contains the text 'Asthma, Adolescent'. Below the navigation bar, the main content area is titled 'DISEASE/CONDITION Asthma, Adolescent'. On the left, there's a 'CONTENT' section with a list of topics: Red Flags, Incidence/Prevalence, Etiology/Pathophysiology, Risk Factors, Prevention, Signs/Symptoms, Potential Complications, Diagnosis, Treatment Considerations, and References. The main content area displays a 'Description' section with text about asthma: 'Asthma is a chronic inflammatory airway disease characterized by bronchoconstriction, bronchial hyperreactivity, airway inflammation, and airway remodeling. Effective asthma management helps preserve lung function, limit exacerbations (also called asthma attacks), and reduce emergency department utilization. In adolescents aged 12-17, the responsibility of asthma control gradually shifts from parent to patient.' Below the description, there's an 'Image 1: Asthmatic Airway' showing a diagram of an airway. On the right, there's a sidebar with 'Images' and 'Videos' sections. The 'Images' section shows a diagram titled 'Asthmatic Airway' with a list of factors: 1. Normal airway, 2. Relaxed smooth muscles, 3. Tightened smooth muscles, 4. Increased mucus production, 5. Inflamed thickened wall, 6. Asthmatic airway during attack. The 'Videos' section shows a video thumbnail titled 'Asthma Management in Adults'.
