

Takeda Study

In order to strengthen medical students and personnel's humanistic spirits and also emphasize the importance of legal and ethics issues, our former dean of College of Medicine Kun-Yen Huang specifically developed this area by the funding support of Takeda Chemical Industries, Ltd in 1989.

Medical Humanities Area

This area is an expansion of Takeda Study with additional books on medical ethics, laws, doctor-patient communication, and medical charting.

The collection in this area covers the topics of medical history, ethics, philosophy, biographies, and novels, aiming to both broaden and deepen the knowledge of students, lecturers, and medical personnel.

about Kun-Yen Medical Library

The library houses medical and healthcare-related collections, and not only supports the education and research activities of the students and faculty in the University and the medical center, but also serves as the regional medical library.

Based on the founding dean Professor Kun-Yen Huang's expectation for the library's well-run, we aim to serve as the partner of the medical personnel and provide immediate information access.

Focus On >>>Medical Humanities Collection

To cultivate the essential value on both medical expertise and humanism, our library specifically created "Takeda Study" and "Medical Humanistic Area" to display medical humanities-related books.

History

Oct 1984 Established at Chien-Kuo Campus

Jan 1989 Relocated to College of Medicine

Feb 2009 Renamed “Kun-Yen Medical Library”
