Medical Library E-Journals System Introduction

By using the E-Journals System to see if we have full-text of a journal available. The E-Journals System offers several ways to locate e-journals.

❊ Sort by journal title.

❊ Sort by JCR category.

❊ Sort by agency.

❊ Customize search: you can use journal's full title, journal's abbreviated title, shelf number of journal, JCR category, agency, printed ISSN or electronic ISSN as a search term and then choose the corresponding search field. It is easy to use and clearly indicated not only what e-journals contain the full-text but also what years are available. The shelf number field can also show if the library collects the printed journal also.

❊ You are always welcome to ask a librarian ext. 5122 or 5199.
