The screenshot displays the Cochrane Library search results interface. On the left, there is a 'Filter your results' section with a 'Year' filter set to 'Year first published'. The year list shows counts for 2021 (1), 2020 (1), 2019 (3), 2018 (2), and 2017 (2). A 'Custom Range' section has two input boxes for 'yyyy' and 'to yyyy'. At the top, navigation tabs include 'Cochrane Reviews' (0), 'Cochrane Protocols' (0), 'Trials' (18), 'Editorials' (0), 'Special Collections' (0), 'Clinical Answers' (0), and 'More'. A purple banner at the top right contains a warning icon and the text: 'For COVID-19 related studies, please also see the Cochrane COVID-19 Study Register'. Below this, the search results show '18 Trials matching "#6 - #1 AND (#2 OR #3) AND (#4 OR #5)"'. The source is identified as 'Cochrane Central Register of Controlled Trials, Issue 10 of 12, October 2021'. A prominent purple banner with a warning icon and the text 'Authenticate to get access to full CENTRAL content' is highlighted with a yellow border. To the right of this banner is a dark blue button that says 'Unlock the potential of Cochrane Evidence >'. Below the banner, the 'Order by' dropdown is set to 'Relevancy' and 'Results per page' is set to '25'. The first search result is listed as '1 | The clinical and cost-effectiveness of total versus partial knee replacement in patients with medial compartment osteoarthritis (TOPKAT): 5-year outcomes of a randomised controlled trial'.
